

# 7 SEVEN UP STONE

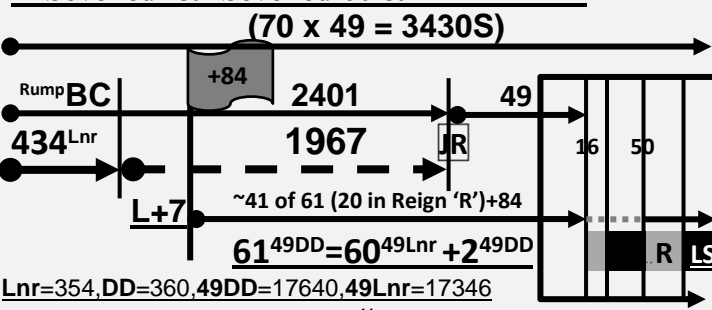

from the 'extra' '7' and it assigned to the end of 20 Boxes as a 'completer' to the ~41Boxes halted @ 2016; is proven correct. And the continuation theory into 2023 for the '41' 49's is proven incorrect. As a final note, the 84 intrusion start-point, and subsequent carry-through until 2016 'halt', reveals the 'Apoc-sign' in that the 84 days are 2016 (hrs)...which halt at year 2016...followed by 2436 to Apoc.: ea. '7'='2016+2436'

-E6: the Prophet's knot Review Charts-

**Daniel 9:24**  
Seventy [H7657] sevened [H7620] (49) for people and City  
70777777 = 3430 Parameter:

### '7 Sevened' & 'Sevened 60 & 2'

### Prince #1 (KON) and Prince #2 (VKON): Both [H5057]

Now, a brief circle-back regarding the #1 Prince of v25. The word for 'Prince' is [H5057]. It means 'Military Commander occupying a front'. According to E6, the 'Prophet's Knot' (the seventy-sevened riddle of Daniel 9:24-27), #1 Prince is revealed in 2016 (November 8 USA election). In his first term he was not a [H5057], for he went to war with no one...but he was 'revealed'. This means that he will win a 2nd-term in the 2024 USA election where he will indeed become 'Military Commander occupying a Front' and go to war as KON described in Article '5250 placement' where his exploits against KOS are described. The KON/KOS prophecy isn't discussed in Daniel 9:24-27 but rather, in Daniel 11, along with VKON (#2 Prince; also a [H5057]) shown in Daniel 9:26 and mentioned as 'the Prince to come'. VKON comes after KON. KON is shown as re-elected and rising to power as [H5057] in D11:3, after the Persian-conquest (2nd broken Horn on the RAM; Media-Iraq was broken during the 1st campaign of the Goat of D8 which began the D8 prophesy in 2003) which Persian-campaign precedes KON's either re-election in 2024 or swearing-in in January 2025 (see Article 'FRONT' n1p4).

As for #2Prince [H5057] 'to come' mentioned in v26 and v27, he is shown in D11:21 rising-up in KON-tax's place (D11:20), who rose up in KON's place (D11:19) after KON dies. VKON is 'little-horn' (LH) of D8, shown rising from the 4-horns who divided the Goat-nation (USA) 4-ways also shown in D11:4 soon after KON's USA 2nd-term re-election rise to power. Remember the Goat of D8, call 'the king of Greece' (41: returning goat-66 'Alexander the Great') divided his nation amongst his 4 generals the first time. So he does it again after KON's re-elected rise to power as [H5057].

As mentioned on n4p2a, I spotted this #1Prince by separating the quote in v25 'to Messiah/Prince' into 2 people, as I did for the 'command' quote 'to Restore (from) rebuild'. I then assigned the '7 sevened-amounts' to #1Prince-line with its attached smaller 'sev'd' (49) unknowingly obeying the instruction-design:

7 'sevened (6&1)' amounts={('6' 343's) + ('1' 343+49)}

Jehovah computed the J-comp on the first day, 5.5.2002, delivering me the answer of 2401 (7 grand sev'd) - 434=1967 (this MSE unknown to me in 2002) enabling me to continue past stage-1, stage-2, and stage-3 as described in Article 'the Apostle' in letter 5 (see n5p5b). I then assigned the 'sevened 60 and 2' to the Messiah-line as described previously:

'Sevened(49)' x 60 and 2= (60 x 49L+2 x 49DD)

Now, as for #2Prince 'to come', v26-27, he strengthens a 'covenant' with many for one 'sevened' (5250) as described in later section. The design of this 'covenant' is shown on n4p6 in the section titled '5250'. D11:23 also refers to the D9:26,27 'covenant' as well. His exploits are shown running from D11:23

(introduced) to D11:45 where he also, like KON, comes to his end. Following this is the 2nd 42-months (after the 2300 days) where Michael, once cast to the ground and trampled, stands up as described in following section. These accounts can be seen in E6 and its ledger on n4p2.

### Miracle-Account '2436': 2016 to Apocalypse 2023

This account, 2436, is shown in E6 and in the quick-ledger of E6. This is the extra-time beyond Christmas 2016 at '2450 completion' as described in the preamble on n4p1. It runs from 12.25.16 to E3, E1/E7, and E5 within year 2023; displayed as 2392+33+11 toward these Apocalyptic outset accounts. 2436 overlaps ledger-account E3-1260 by 44-days, appearing at first-look to be a 'ledger-total double-count'...but it isn't. First, 2436 must and is properly shown with cryptic-notes shown at-right citing the overlap. But 2436 must be displayed this way for 2 reasons. (1) 2436 with its preceding deduction of 84 for the LS reveals the 60&2 'Apoc-pattern' (84+2436) explained on n4p4. And (2) 2436 dovetails with the E5 'Advance', both affirming eachother @ E5 outset, 8.27.23. As for the 'overlap', appearing as a 44-day 'ledger double-count'...the solution is found in the E5-1260 shown in R12:6 and as appearing before the 5250 (TT & I/2T) account with 'Her' described as leaving the E5-1260 account (flown) and entering the other (5250). Thus, according to scripture as laid-out on-page, these 2 accounts are consecutive; E5-1260 then 5250.

However, E5-1260 actually ends its chronological-count on 12.25.26, @ 1216 of its 1260 at the death Moses/Elijah. It is here that the Chronology-total of the other accounts begin, causing a lap-over of E5-1260 by 44-days: (0.5 day war)+3.5 dead+8 day B.C. 434 credit (153628+8) from 12.29.26-1.6.27 accounting for the final 8 days of E1-42 NM months (see '7th Trumpet' n1p10)+32 days into 5250 (1.7.27-2.7.27). Thus the allotted E5-1260 in R12:6 is reduced by 44-days making 1216 days of its chrono-count-total, before the others overlap it. This then synchronizes, by a 44-day deduction of its chrono-count, the 44-day 'apparent' double-count of 2436 overlapping E3-1260 with both shown as a ledger-totals. The fact that these 4 tail-end accounts (0.5+3.5+8+5250) lap-over E5-1260 (reduced to 1216 of chronological-count) proves the ledger-design is correct. And of course, if 2392 were placed before E3-1260 in the ledger (instead of 2436), with 44 counted as an overlap at-end, the ledger wouldn't reflect the necessary data-points of (1) and (2) above. The E6-ledger is designed correctly; properly (note; 8 days is proven a B.C. 434 back-fill for if it weren't the 8 days would have to be shown after 3.5, thus throwing-off....
